STACK & CRAFT / MAKE WITH CONFIDENCE

Before you buy, check the stack.

A one-page record for your machine, plates, and next accessory.

01 Identify the equipment you already own

Machine brand + exact model: _____

Plate-system name + printed letters / numbers: _____

Accessory brand + exact name / SKU + generation: _____

Accessory width / length + units: _____

02 Find the instructions that match

- ☐ The source names my exact machine, plate system, and accessory category.
- ☐ I checked whether the result is documented, inferred, unverified, or unsupported.

Manufacturer manual / chart / page: _____

Date checked + any generation or size limits: _____

03 Avoid a duplicate or unsuitable purchase

- ☐ I compared the required parts with what is already in my machine bundle.
- ☐ I checked the exact SKU, quantity, current price, and shipping destination.
- ☐ I will not add unlisted plates or force a tight stack.

04 Keep the useful details

- ☐ I saved or printed the matching finder card and recorded its source.
- ☐ I exported my CSV before clearing browser data or moving to a new domain.

This checklist is not a compatibility recipe or a pressure calculation.
Use the current manufacturer instructions. No hands-on test is claimed.
